

## Introducing CEE NEWS (December 2015)

Welcome to the first CEE HydroSystems newsletter. In addition to passing on details of interesting field activities related to CEE HydroSystems equipment and upcoming new product information, we will include useful information that might benefit accuracy or efficiency of your survey jobs. Have any photos, videos or details of your surveys that you can share? If so then we would like to hear from you; just drop us a line.

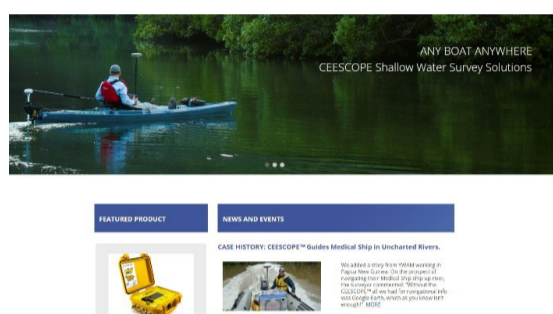

We are not perfect, and neither is our email list. If you have received this in error, or are no longer connected to CEE HydroSystems please just click the "unsubscribe" link below. Of course, we hope you will be interested in our great new web site, new products and new services for 2016.

### US Office Opens in San Diego

To continue growth of CEE HydroSystems overseas, we have opened a US office in San Diego, California, and welcome Adrian McDonald as Vice President - Sales. Adrian comes to us from Teledyne Oceanscience, with plenty of experience operating CEE echo sounders.

### Huge Website Update!

We have launched a brand new website with more detailed information about our latest products, as well as new technical resources and customer features. [CLICK HERE](#) to visit the new web site.

### PWC Survey System for Gold Coast

The City of Gold Coast, Queensland Australia has taken delivery of the latest CEE JET™ surf zone survey system, featuring a CEESCOPE™ RTK echo sounder and on-board PC running HYPACK®. The turnkey system will be used in a beach sand nourishment monitoring program that is among the longest running in the world. [READ MORE](#)

### CEESCOPE™ Navigation in PNG

We started a Case History page on our new web site. First to be added was the story of unusual navigation surveys being conducted by YWAM in Papua New Guinea. The CEESCOPE™ is used to guide a medical ship through uncharted rivers to bring aid to remote village communities. [READ MORE.](#)

### So You Really Want to Survey on a Jetski?
